

Lifetime Warranty against breaking – direct replacement for plastic handles

Single CAM Ejector handle for VME and VXI

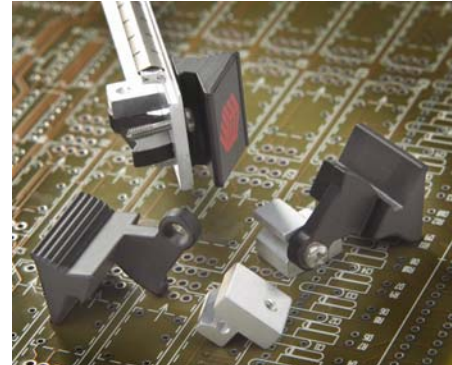

Triple E continues its tradition of rugged, extruded aluminum Eurocage components with the introduction of the Triple*Ease™ Single CAM VME ejector handle. This unique all aluminum handle is backed by a lifetime warranty against breakage, making it the only choice for rugged COTS VME ejector handle requirements.

Our all aluminum handles offer many advantages compared to conventional plastic handles. The Single CAM ejector will fully eject the PCB from the backplane, providing twice the travel compared to plastic.

Finger grips are extruded into the all metal handle ensuring a firm grip for a confident eject, time after time.

Triple E can supply a silk-screened self-adhesive ID label, which is mounted securely to the handle. The black powder coat provides a durable, scratch resistant finish.

Triple E has an experienced design team ready to work with you to create handle and panel solutions tailored to your specific requirements.

Handle kit includes top and bottom ejector handle, universal mounting blocks, pivot bushings, press-in plastic sleeves, silver mylar handle labels and mountings hardware.

Triple E handle in background, competitor plastic type in foreground. Handles shown fully ejected.

Feature

All metal extruded handle

Single CAM design

Durable powder coat finish

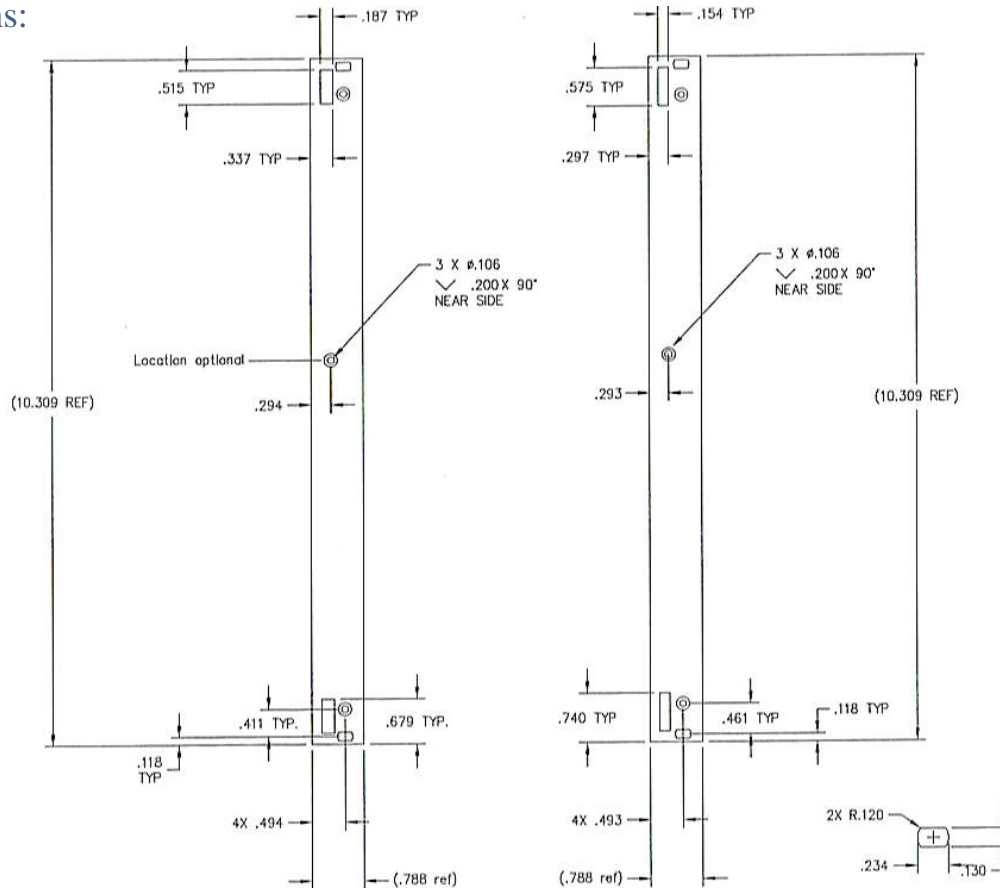

Drop in replacement design

Benefit

- ✓ Will not break, outgas, melt, burn or bend
- ✓ Finger grips facilitate a firm grip
- ✓ Solid surface for ID plate to attach and stay
- ✓ No sharp edges
- ✓ 0.300" eject travel vs. 0.150" typical with plastic
- ✓ Complete extraction of PCB from backplane
- ✓ Chip, wear and scratch resistant
- ✓ Standard finish is a smooth black powder coat
- ✓ Minimal changes to existing drawings
- ✓ Easier to assemble than plastic, saves time
- ✓ Direct replacement for most plastic handle kits
- ✓ Meets VME, VXI and EEE1101.1 requirements

Specifications:

Type "W" panel

Type "N" panel

Ordering information:

3U Handle kit
Type "W"
 EJL-VM-W-X4-X4-B2

6U/9U Handle Kit
Type "W"
 EJS-VM-W-X4-X4-B2

Center PCB mounting block
 CMB-W (Designed for use with type "W" panel)
 CMB-N (Designed for use with type "N" panel)

Type "N"
 EJL-VM-N-X4-X4-B2

Type "N"
 EJS-VM-N-X4-X4-B2

Center block sold 10 per kit

Kit includes:

- (1) Lower extractor handle
- (1) Upper PCB mounting block
- (1) Handle PCB mounting block
- (1) Pivot bushing
- (1) silver mylar label
- (1) Press-in plastic sleeve
- misc screws for assembly

Kit includes:

- (1) Upper extractor handle
- (1) Lower extractor handle
- (2) Handle PCB mounting block
- (2) Pivot bushing
- (2) Silver mylar label
- (2) Press-in plastic sleeve
- misc screws for assembly
- Center PCB mounting block NOT included.
